

Elixair[®] E400

E400 is a small air decontaminator unit designed to be placed on the floor. The unit draws in indoor air from the front and blows out the clean air through the fan placed on the backside of the unit. The unit has two power areas and it is designed for continuous usage. E400 is easy to move as it comes with wheels.

| Technical information | Elixair [®] E400 |
|------------------------|----------------------------|
| Cleaning capacity | max. 240 m ³ /h |
| Cleaning efficiency | 99,8 % |
| Gas removal | Active carbon |
| Installation | Stand-alone |
| Fan speed | 2 |
| Dimensions (W x H x D) | 345 x 530 x 360 mm |
| Weight | 12 kg |
| Material | Plastic |
| Sound level | 22–36 dB |

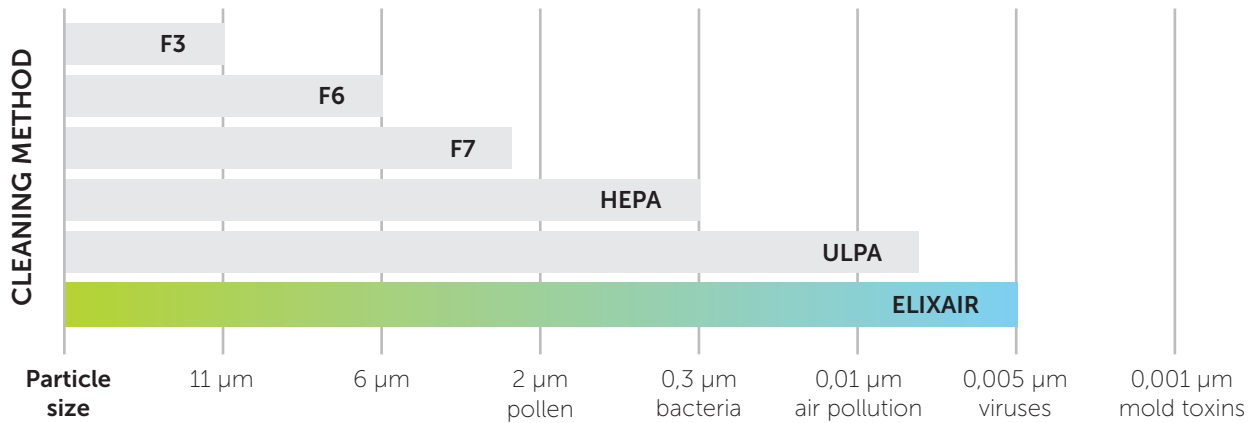

Elixair collector cells are washable.

Elixair technology

– 4-step filtering system

OPERATING PRINCIPLE

The Elixair duct filter has a 4-steps filtering system. First, a prefilter captures the larger particles. Then, electronic collector cell collects the smallest of particles. Finally, the active carbon collector removes odours and gases.
